EXPERIENCE

Vector & Ink

Lead Web Developer

August 2016 - Present

Web Developer

August 2015 - August 2016

- Develop responsive and optimized WordPress sites from development to launch using a combination of WordPress, Foundation, and Timber.
- Oversee a three person development team and maintain coding standards and best practices. Share knowledge and give assistance when needed.
- Train and mentor new developers on development process, coding standards, and best practices and familiarize them with current processes and the frameworks and technology used.
- Maintain library of reusable code including WordPress starter theme, custom plugins, and code snippets used to speed up development time.
- Created boilerplate code that is used to start new WordPress projects, decreasing time needed for starting sites and allowing for easier site maintenance for developers.
- Increased front-end performance of sites by implementing optimizations in our starter boilerplate, such as combining CSS and JavaScript to reduce requests, removing blocking requests, and switching to SVG icon sets.

EDUCATION

UNIVERSITY of WISCONSIN—STEVENS POINT 2014
STEVENS POINT, WISCONSIN

Bachelor of Arts in Web & Digital Media Development

SKILLS

HTML5, CSS3

SCSS

JavaScript (ES6, jQuery)
